ELECTRONICS EQUIPMENT
LOURDES MILITARY HEADQUARTERS TORRENS, CUBA

1. **SIGNIFICANCE:** First identification of ELINT equipment, a new COMINT electronic site under construction, and mobile parabolic dishes, possibly satellite related, in Cuba.
2. **REMARKS:** [REDACTED], newly identified ELINT equipment was observed in two separately secured areas near the administration area at Lourdes Military Headquarters Torrens. This equipment included a MESH BRICK, a possible BOX BRICK, and an unidentified probable ECM. The new COMINT electronic site is a probable modified FIX-24 under construction near a FIX-24 site previously identified at this installation. Initial construction on the control building for the new array was evident in May 1974.

25X1

Two newly identified mobile parabolic dishes, possibly satellite related, were at a newly constructed, separately secured area near the headquarters building. Each dish is approximately 15 feet in diameter and mounted on a gun-mount-type chassis atop a drive-up platform. The dishes are emplaced at right angles to one another adjacent to the southeast corner of a large square control building. This is the first identification of these parabolic dishes outside the Soviet Union.

Possible satellite-related equipment previously identified at this installation included a possible optical tracking tower and a possible telemetry antenna. Associated communications equipment includes a single rhombic receiving antenna.

A new electronics facility, possibly associated with this installation, is under construction 2.4 nautical miles (nm) south-southeast of the headquarters (not depicted on graphic). This facility was previously identified as Torrens Possible Sam Site [REDACTED]
